EXPERIENCE

ETHZ Institute for Dynamic Systems and Control Master's Thesis Student

May 2025 - December 2025 - Zürich

Created an RL trained humanoid skating robot, utilizing inline skates fitted onto a Booster T1 humanoid robot. Created custom gym environment along with realistic wheel models and tuned reward functions. Policy successfully deployed in sim2sim and sim2real. Results provide a much quicker, more efficient, and robust locomotion than previous work on humanoid skaters, all the while using no motion priors or imitation learning.

Verity

Machine Learning and Insight Generation Intern

October 2024 - April 2025 - Zürich

Repurposed existing warehouse drone hardware and computer vision software stack to enable forklift warehouse tracking and registering of pallets moved. Deployed prototype at client facility and acquired success and reliability metrics. Used findings to generate simulated warehouse operation and error detection models to analyze market feasibility of solution. Demonstrated value in continuing research into creating hybrid warehouse drone and forklift tracking system.

Soft Robotics Lab - Real World Robotics Project

Team Member - Reinforcement Learning & Design

September 2023 - January 2024 - Zürich

Created a bio-mimetic 11 DoF hand for the ETHZ Soft Robotics Lab's Real World Robotics project. Designed hand hardware from scratch. Trained an RL policy in NVIDIA's Isaac gym that allowed the hand to roll a ball in different axes at a desired velocity. Deployed policy in real world successfully.

Spanner Product Development

Product Design / Mechanical Engineering Intern

June 2021 - August 2021 - Silicon Valley

Consulted on design, engineering, and manufacturing decisions for various Internet of Things products at various product life-cycle stages. Consulting done for both startups and large companies. All projects successfully completed, and further consultant contracts drafted, invited to return.

EDUCATION

ETH Zürich

2023 - 2026, Zürich, Switzerland

PhD, Institute of Dynamical Systems and Control, D'Andrea Group

ETH Zürich

2023 - 2026, Zürich, Switzerland

MSc Robotics, Systems, and Control

New York University

2019 - 2023, New York City

B.S. Mechanical Engineering, Cum Laude -
GPA: 3.8/4.0

Exchange - CentraleSupélec

January 2021 - June 2021, Paris, France

Exchange program at leading engineering school.

ACADEMICS

2023 Best Senior Design Award

NYU Tandon Dean's List

Tau Beta Pi Academic Fraternity Member

GLASS Fellow

TOOLS & TECHNOLOGIES

Isaacsim, Omniverse, PyTorch,
OpenCV, MuJoCo, Python, C++,
Matlab, ROS, Linux, CAD, FEM

LANGUAGES

English (fluent)

French (fluent)

Spanish (conversational)
